

# Bhathiya Lakshan

SOFTWARE ENGINEER (INTERN)

## PROFILE

I am an enthusiastic, self-motivated, responsible, and hardworking individual. As a mature team worker, I adapt to challenging situations and can work effectively both independently and as part of a team. My experience as a team leader on campus has honed my leadership and collaborative skills. I am capable of working under pressure and meeting deadlines, and I approach tasks with an active and dynamic mindset to ensure successful completion.

## SKILLS

Programming Languages: C, Java, C++, C#, PHP, JavaScript, React.js, Node.js,

Data Bases: MySQL, MongoDB

Source and Version Control: Git, GitHub

Developer Tools: VS Code, Visual Studio, NetBeans, Dev C++, Android Studio

## EDUCATION

### Higher Diploma in Computing and Software Engineering

Cardiff Metropolitan University (Expected in 10/2024)

### GCE Advanced Level Examination | Technology

Central College, Kuliypitiya (2019)

### GCE Ordinary Level Examination

Central College, Kuliypitiya (2016)

## PROJECTS

**DriveMate:** This research project, developed using Java, is designed for driving learning schools to train drivers effectively. The software aims to replace traditional training methods with a comprehensive online system, enhancing the learning experience for new drivers.

**Debra EMS:** Debra is a service-oriented project developed using ASP.NET. It encompasses both a website and a Windows desktop application. The project aims to provide seamless integration between these platforms to deliver efficient service solutions.

**EManager:** eManager is a Java-based employee management system developed using object-oriented programming (OOP) concepts. It provides a simple yet effective platform for managing employee data.

**Student Information System:** CLI project is based on C++

**Cineplex, Bliss Café:** Simple web applications developed using HTML, CSS, JavaScript, PHP
